

Welcome to your virtual healthcare consult.

Relax and make yourself comfortable while you wait for the care team to call you.

When your care team is ready to see you, they will dial the tablet in your exam room. **When you hear the device ring, wait 5 seconds then the device will automatically join the video call** with your care team.

Please don't touch the video tablet, everything will be controlled for you automatically.

If any troubleshooting is needed, a care team member will come assist you.

Thank you for choosing our healthcare facility.
